PROFILE

Full Stack Software Engineer (Java / Angular) with **4 years of experience** building business applications with **Spring Boot, Angular and PostgreSQL**: an invoicing and stock management application, and a human resources and payroll application. Comfortable with complex business rules (Tunisian tax regulations, payroll calculation, multitenancy) and committed to reliable, regression-free delivery. Used to working with AI on a daily basis (code analysis, development, documentation). With 5 years of prior experience in technical project management and team leadership, I combine engineering rigor with a strong sense of delivery.

TECHNICAL SKILLS

Back-end	Java 8 / 11 / 17, Spring Boot 2 / 3, Spring Security, Spring Data JPA, Hibernate, Spring MVC, REST APIs, Swagger, Microservices, Maven, Log4j
Front-end	Angular 13 → 16, TypeScript, HTML, Bootstrap, ReactJS, Capacitor (mobile)
Databases	PostgreSQL, MySQL, SQL Server, MongoDB, SQL, Liquibase
Reporting / PDF	JasperReports, Thymeleaf, Flying Saucer
DevOps & tools	Git, GitLab, Jenkins, Docker, SonarQube, IntelliJ IDEA, Eclipse / STS, Visual Studio
AI	AI-assisted development (Claude, GitHub Copilot): code analysis, design, code generation and review, documentation
Methods	Agile Scrum, UML, requirements analysis and functional specification
Business domains	Invoicing and stock management, Tunisian taxation (VAT, stamp duty, withholding tax, TEJ), HR management and payroll

PROFESSIONAL EXPERIENCE

Full Stack Engineer – Java & Angular – AXEANE February 2026 – Present

Axeane Novia – SaaS invoicing and stock management application (quotes, delivery notes, invoices, credit notes, payments)

- Full stack development of business features: Java / Spring Boot back-end, Angular / TypeScript front-end, PostgreSQL; designed and integrated REST APIs between front-end and back-end.
- Extended invoicing in line with Tunisian tax rules: VAT, stamp duty, withholding tax (per-payment withholding, "filed" status, TEJ XML files), financial adjustments.
- Hardened financial calculations (credit notes, net payable, prorated VAT, withholding tax); analyzed and fixed defects, with SQL migrations (Liquibase) to correct existing data.
- Maintained and improved existing features on a large, long-lived codebase.
- Document and report generation with JasperReports and HTML-to-PDF templates (Thymeleaf / Flying Saucer): conditional display, print settings.
- Role- and group-based access control; centralized e-mail sending for all documents.
- Functional enhancements: company multi-contact, bank accounts, Quote → Delivery Note → Invoice conversions, mobile app adaptation (Capacitor).
- Functional and technical analysis of requirements before development; AI-assisted development (Claude, GitHub Copilot) for code analysis, debugging and documentation.

Stack: Java, Spring Boot, Spring Data JPA, Spring Security, REST APIs, Angular, TypeScript, PostgreSQL, Liquibase, JasperReports, Thymeleaf / Flying Saucer, Git.

Full Stack Engineer – Java & Angular – C&A TRADE DIGITAL SERVICES August 2023 – January 2026

TDS – cloud HR management application: design and development of the Human Resources and Payroll module

- Designed and developed the HR and Payroll module: employee, contract, leave and attendance management, performance reviews and automated payroll calculation.
- Integrated external data sources (APIs, CSV, Excel) and implemented multilingual support.
- Built HR / payroll dashboards and tracking reports, with PDF document generation using JasperReports.
- Contributed to a secure multitenant architecture (Spring Security), with a focus on scalability and maintainability.
- Improved the user interface and user experience of the Angular screens.

Stack: Java 17, Spring Boot 3, Angular 16, PostgreSQL, Spring Data JPA, Spring Security, Swagger, REST APIs, Docker, GitLab, Multitenancy, JasperReports.

Freelance Full Stack Developer – Java & Angular – DITRIOT CONSULTING August 2022 – July 2023

Continued development of the internal HR platform built on microservices, started during my final-year project

- Evolved the platform after the final-year project: new features and enhancements across the microservices and the Angular front-end.
- Back-end development with Spring Boot / Spring Data JPA, REST APIs between microservices.
- Authentication and role management with Spring Security.
- Maintenance and quality: continuous integration with Jenkins, code quality monitoring with SonarQube, version control with Git.

Stack: Java 8, Spring Boot 2, Angular 13 / 14, TypeScript, Spring Security, JPA, MySQL, Docker, Git, Jenkins, SonarQube.

Technical Project Manager – SHILDOM TUNISIE September 2013 – June 2018

Electronic security systems and computer networks

- **Project Manager and Works Supervisor (2015 – 2018)**: planned and managed security / network projects for public and private clients, acted as liaison between clients, technical teams and management, met deadlines and budgets, set up project reporting and KPIs.
- **Technical Team Leader (2014 – 2015)**: led a team of 5 to 10 technicians, coordinated installations and maintenance, trained new team members.
- **Senior Technician (2013 – 2014)**: installed CCTV, alarm and access control systems, maintained networks (TCP/IP, LAN/WAN), performed security audits.

ENGINEERING INTERNSHIPS

Final-Year Project – Full Stack Developer Intern – DITRIOT CONSULTING February 2022 – July 2022

Internal social network platform for HR management, built on a microservices architecture

- Requirements analysis, functional specifications, UML modeling and definition of the microservices architecture.
- Developed authentication, company and employee microservices (Spring Boot, Spring Data JPA, MySQL) communicating through REST APIs.
- Angular front-end; authentication and role management with Spring Security.
- Continuous integration with Jenkins, code quality monitoring with SonarQube, version control with Git.

Stack: Java 8, Spring Boot 2, Angular 13 / 14, TypeScript, Spring Security, JPA, MySQL, Swagger, Docker, Git, Jenkins, SonarQube.

Full Stack Developer Intern – DSI ESPRIT July 2021 – September 2021

Stock movement management application (inbound, outbound, stock levels, traceability)

- Requirements analysis, definition of actors and roles for access control, database and software architecture design.
- Developed the Spring Boot / Spring Data back-end with MongoDB.
- Unit and integration testing to ensure code reliability.

Stack: Java 11, Spring Boot, Spring Data, JPA, MongoDB, ReactJS, REST APIs, SonarQube.

EDUCATION

Computer Engineering – Software Engineering 2019 – 2022
ESPRIT – Private Higher School of Engineering and Technology

Professional Master's in Metrology and Instrumentation 2018 – 2020
Faculty of Sciences of Sfax

Applied Bachelor's in Electronics, Electrical Engineering and Automation – Industrial Computing 2010 – 2013
Faculty of Sciences of Sfax

CERTIFICATION

Agile & Scrum: Pass the PSM I & PSPO I certifications November 2025
Udemy – certificate of completion
